Developer Profile

Full Stack JavaScript Developer with real-world practice and theoretical understanding of modern tools and technologies of frontend and backend development. Developed full stack applications using the latest features of JavaScript, React and its ecosystem from concept to completion. Meticulous attention to quality and detail is in my nature. Learning every single day so I can guarantee clear and efficient code meeting the latest state of technology. Excellent team player. Have previous work experience in construction management which helps me a lot to efficiently build rapport with clients. Regular contributor to popular DEV community. Constantly trying to keep up with the latest trends in the industry standards and new technologies.

AREAS OF EXPERTISE:

- JavaScript, React, Angular
- Mobile First Web Design
- Cross-browser compatibility
- Node, Express, Mongo
- Graphic Design
- Sales & Marketing
- Responsive Web Development
- UI/UX Design
- Relationship Building

TECHNICAL PROFICIENCIES

Front-end: JavaScript, React, Redux, DOM manipulation, semantic HTML, CSS, RWD (Bootstrap 5, CSS, Grid, Flexbox, mobile-first approach), consuming third party APIs (Fetch, axios, async/await, JSON)

Back-end: Node.js, Express.js, npm, authentication/authorization with JWT, Passport.js, EJS templating engine, building RESTful APIs

Databases and data management: MongoDB (Mongoose, MongoDB Compass)

Development & Deployment tools: Git, Github, Heroku, Netlify, Postman, VS Code

Other tools and technologies: Adobe (Photoshop, Illustrator, XD, Dreamweaver), Mailchimp, FileZilla, MailGun, Wordpress

RELEVANT WORK EXPERIENCE

Freelancer   **2023 – current**
Full Stack Developer

EXPERIENCE HIGHLIGHTS

Personal Projects

Fullstack MERN Application for renting or selling real estates.

https://proprentclient.onrender.com/

- **Full stack real estate rent application built using React, Node.js, Express, MongoDB**

- **Extensive back-end API built from scratch**
